## SUMMARY

---

Detail-oriented data analyst with a strong background in working with numbers, financial models, and large datasets. Experienced in using Excel for model building, Python for data analysis, and Power BI for dashboards. Comfortable managing borrower data, running credit risk analysis, and helping teams make data-driven decisions. Quick to learn new tools and happy working in fast-paced environments where priorities can shift.

---

## TECHNICAL COMPETENCIES:

- Financial Analysis & Forecasting
- Data Analysis & Visualization
- Excel (Financial Modelling, Forecasting)
- Python (Data Analysis, Pandas, NumPy, Automation Scripts)
- Power BI (DAX, Power Query, Dashboarding, Reporting)
- MySQL (Data Structuring, Extraction, Normalization, Joins)
- AI Tools (ChatGPT, Copilot)

## EXPERIENCE

Fresher

## EDUCATION

CSMU Bachelor Of Computer Application (BCA) | CGPA: 7.86 | **July 2023**

[Additional Education Course] Masters In Data Software Engineering | IT Vedant | **Oct 2023 – Jan 2025**

## PROJECTS

---

### Sales Performance Dashboard (Power BI) [link](#)

- Designed an interactive Power BI dashboard to track monthly sales performance.
- Reduced report preparation time by 30% through automation.

### Sales Dashboard (MS Excel): [Link](#)

- Created a comprehensive sales dashboard to track sales performance, revenue, and growth trends.
- Utilized Excel functions and pivot tables to analyze sales data.
- Visualized key metrics and KPIs using charts and graphs to support business decisions.

### Covid 19 Analysis Dashboard (Tableau): [Link](#)

- Developed an interactive dashboard to track COVID-19 cases, recoveries, and fatalities.
- Integrated real-time data for accurate and up-to-date insights.
- Implemented filters for region-wise and time-based analysis.

## CERTIFICATION

---

1. Python Programming [[Kaggle](#)]
2. Introduction to SQL [[Great Learning](#)]
